Team Meeting 2

Date: August 12, 2018

Day: Sunday

Time: 6:30 p.m

Duration: 1hr and 30 min.

Attendees:

1. Aman Yadav (201651007)
2. Dakshkumar Gondaliya (201651014)
3. Kirtika Singhal (201651024)
4. Mayank Pathela (201651029)
5. Nikhil Sachan (201651034)
6. Parmeshwar (201651035)

Previous Meeting Follow-Up:

We researched the project ideas we can work on and came up with five ideas.

Goals:

1. Discussing all the available ideas , and selecting our top three according to priority.

Discussions:

1. The ideas pitched were-

   a)Automated TimeTable Generator,

   b)PG Finder,

   c)Elective Subject Reviews,

   d)Online Library System,

   e)Old Books

2. Checking feasibility of each projects and discussing which environment and platform can be used for them.
3. Each project idea description:

- Automated TimeTable: Generating the time table by an algorithm, reducing the time and efforts of person setting time-table by himself.
- PG finder will help students to find PG according to their location preferences without the need of roaming in the city.
- Old books selling and purchasing : Will help people to sell the books to the ones who need them at reasonable rates. Thus a good circulation of used books.
- Elective Subject Reviews: Will be very helpful for students to opt for elective subjects by looking for reviews given by the seniors and others who have knowledge of that subject.
- Online Library Systems: Will help in checking the status of books in library from any place and thus saving time of going to library. Also provide e-books.

Conclusion:

Dropped the idea of PG finder because it will be difficult to find real-data. And also dropped Online Library Systems because other three seemed more interesting.

Based on the discussion , the top three priorities set were:-

1) Automated TimeTable Generator,

2) Old Books,

3) Elective Subject Reviews

Tasks Assigned:

Think of the feasibility and researching how each of the top three ideas are to be implemented.

Next Meeting Agenda:

Finalizing the idea and making the work flow chart for that idea.
